SUMMARY

I'm Nor-Amin M. Hadji Ali, a highly adaptable and detail-oriented professional with a strong technical foundation in React.js and Vite.js. I possess robust experience in computer networking, including MikroTik router configuration, and am proficient in troubleshooting. My technical expertise is complemented by practical software development experience gained during my Capstone Project and On-the-Job Training.

I also bring valuable skills as a Graphics Designer and UI/UX Developer, utilizing Figma and Canva to contribute to the redesign of main company websites and enhance user experience. I'm eager to learn new technologies and leverage this unique combination of development, networking, and design skills to contribute effectively to team success.

EXPERIENCE | PROJECT

Software Developer

BRGY Profiling and Management System (Website)

March 2025 - August 2025, Marawi City, Philippines

- Design and developed web application using MERN Stack (MongoDB, Express, and React.js and Node.js), ensuring clean, efficient, and user-friendly interface.
- Developed a web-based system for resident profiling, certificate generator, and QR-code encryption for document authentication.

UI/UX Designer Intern | Technical Support Intern

September 2024 - December 2024, Davao City, Philippines

The Lainchpadteam Inc.

- Redesign the User Interface of the main websites of the company, collaborating with senior UI/UX wordpress developers to enhance functionality and improve user experience.
- Contributed the whole User Interface design in each page.
- Served as a Graphics designer.
- Troubleshooting the problem encountered by the agents, and recorded the call logs after shift.

CAPSTONE LEAD DEVELOPER

September 2022 - August 2024, Marawi City, Philippines

Mindanao State University - College of Information and Computing Science

- Spearheaded frontend development and design, building intuitive user interface using vite.js, react Framework, HTML/CSS, adn JavaScript.
- Served as a team leader, Backend Developer including Mikrotik configuration.
- Acted as Product Manager, defining project scope, creating detailed timelines, and gathering user requirements.
- Managed the full documentation process, including writing the Capstone manuscript, detailing the development process, design decisions and technical architecture of the project.
